A classic for all ages□the □wonderful□ guide to the night sky by the creator of Curious George (Horn Book). Containing star charts, a guide to the constellations, and details about seasons and the movement of the objects we see in the sky, this classic book makes H. A. Rey's passion for astronomy evident on every page. New updates concentrate on the planetary and solar system information in the latter part of the book. Facts and figures for each planet have been revised, and new scientific information has been added, such as Pluto's reclassification as a dwarf planet. There's also a brand-new online resource that allows readers to track the positions of the planets in the night sky till the year 2100. □An excellent introduction to the heavens, to satisfy and stimulate a child's interest□a very useful book.□Kirkus Reviews □Persuades the reader that astronomy is not only easy□it's fun.□The New York Times

Excellent. Saturday Review

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Astronomy is written in clear non-technical language, with the occasional touch of humor and a wide range of clarifying illustrations. It has many analogies drawn from everyday life to help non-science majors appreciate, on their own terms, what our modern exploration of the universe is revealing. The book can be used for either a one-semester or two-semester introductory course (bear in mind, you can customize your version and include only those chapters or sections you will be teaching.) It is made available free of charge in electronic form (and low cost in printed form) to students around the world. If you have ever thrown up your hands in despair over the spiraling cost of astronomy textbooks, you owe your students a good look at this one. Coverage and Scope Astronomy was written, updated, and reviewed by a broad range of astronomers and astronomy educators in a strong community effort. It is designed to meet scope and sequence requirements of introductory astronomy courses nationwide. Chapter 1: Science and the Universe: A Brief Tour Chapter 2: Observing the Sky: The Birth of Astronomy Chapter 3: Orbits and Gravity Chapter 4: Earth, Moon, and Sky Chapter 5: Radiation and Spectra Chapter 6: Astronomical Instruments Chapter 7: Other Worlds: An Introduction to the Solar System Chapter 8: Earth as a Planet Chapter 9: Cratered Worlds Chapter 10: Earthlike Planets: Venus and Mars Chapter 11: The Giant Planets Chapter 12: Rings, Moons, and Pluto Chapter 13: Comets and Asteroids: Debris of the Solar System Chapter 14: Cosmic Samples and the Origin of the Solar System Chapter 15: The Sun: A Garden-Variety Star Chapter 16: The Sun: A Nuclear Powerhouse Chapter 17: Analyzing Starlight Chapter 18: The Stars: A Celestial Census Chapter 19: Celestial Distances Chapter 20: Between the Stars: Gas and Dust in Space Chapter 21: The Birth of Stars and the Discovery of Planets outside the Solar System Chapter 22: Stars from Adolescence to Old Age Chapter 23: The Death of Stars Chapter 24: Black Holes and Curved Spacetime Chapter 25: The Milky Way Galaxy Chapter 26: Galaxies Chapter 27: Active Galaxies, Quasars, and Supermassive Black Holes Chapter 28: The Evolution and Distribution of Galaxies Chapter 29: The Big Bang Chapter 30: Life in the Universe Appendix A: How to Study for Your Introductory Astronomy Course Appendix B: Astronomy Websites, Pictures, and Apps Appendix C: Scientific Notation Appendix D: Units Used in Science Appendix E: Some Useful Constants for Astronomy Appendix F: Physical and Orbital Data for the Planets Appendix G: Selected Moons of the Planets Appendix H: Upcoming Total Eclipses Appendix I: The Nearest Stars, Brown Dwarfs, and White Dwarfs Appendix J: The Brightest Twenty Stars Appendix K: The Chemical Elements Appendix L: The Constellations Appendix M: Star Charts and Sky Event Resources

1. B. Pharma Entrance Examination 2021 is a one-point solution for the entrance exam 2. The book is divided into 4 sections 3. Previous Years Solved papers are given for the practice 4. Precise and detailed text with illustrations eases in learning the concepts 5. This book uses the easy language for better understanding Bachelor of Pharmacy (B. Pharma) is a 4 years undergraduate program in which students study the methods and process of preparing medicines. To get into the proper college or institution one needs to clear the entrance exam that tests the suitability and apparent knowledge required for the course. The Self Study Guide of B. Pharma Entrance Examination 2021 is an on point solution for various B. Pharma Entrances, conceived and designed as according to latest exam pattern. Precise and detailed text with illustrations makes it suitable for all categories of students. Strict approach towards the prescribed syllabus enables students to get focused preparation. Also, Last 9 Years Solved Papers are provided following the actual trends of the exams and helping students to get prepared accordingly. A Must have book for those who really aspire to be a pharmacist. TOC Solved Papers (2020 - 2012), Physics, Chemistry, Botany, Zoology, Appendix

Finally a complete study guide for educators seeking certification in Middle Grade (4-8) Science is available. It is available online through download or hardback. The book covers all the topics on the ETS produced Praxis II Middle School Science test.

Earth Science MCQs: Multiple Choice Questions and Answers (Quiz & Tests with Answer Keys) covers earth science quick study guide with course review tests for competitive exams to solve 700 MCQs. "Earth Science MCQ" with answers includes fundamental concepts for theoretical and analytical assessment tests. "Earth Science Quiz", a quick study guide can help to learn and practice questions for placement test. Earth Science Multiple Choice Questions and Answers (MCQs), a study guide with solved quiz questions and answers on topics: Agents of erosion and deposition, atmosphere composition, atmosphere layers, earth atmosphere, earth models and maps, earth science and models, earthquakes, energy resources, minerals and earth crust, movement of ocean water, oceanography: ocean water, oceans exploration, oceans of world, planets facts, planets for kids, plates tectonics, restless earth: plate tectonics, rocks and minerals mixtures, solar system for kids, solar system formation, space astronomy, space science, stars galaxies and universe, tectonic plates for kids, temperature, weather and climate with solved problems. "Earth Science Questions and Answers" covers exam's viva, interview questions and competitive exam preparation with answer key. Earth science quick study guide includes terminology definitions with self-assessment tests from science textbooks on chapters: Agents of Erosion and Deposition MCQs Atmosphere Composition MCQs Atmosphere Layers MCQs Earth Atmosphere MCQs Earth Models and Maps MCQs Earth Science and Models MCQs Earthquakes MCQs Energy Resources MCQs Minerals and Earth Crust MCQs Movement of Ocean Water MCQs Oceanography: Ocean Water MCQs Oceans Exploration MCQs Oceans of World MCQs Planets Facts MCQs Planets MCQs Plates Tectonics MCQs Restless Earth: Plate Tectonics MCQs Rocks and Minerals Mixtures MCQs Solar System MCQs Solar System Formation MCQs Space Astronomy MCQs Space Science MCQs Stars Galaxies and Universe MCQs Tectonic Plates MCQs Temperature MCQs Weather and Climate MCQs Agents of Erosion and Deposition multiple choice questions and answers covers MCQ questions on topics: Glacial deposits types, angle of repose, glaciers and landforms carved, physical science, rapid mass movement, and slow mass movement. Atmosphere Composition multiple choice questions and answers covers MCQ questions on topics: Composition of atmosphere, layers of atmosphere, energy in atmosphere, human caused pollution sources, ozone hole, wind, and air pressure. Atmosphere Layers multiple choice questions and answers covers MCQ questions on topics: Layers of atmosphere, earth layers formation, human caused pollution sources, and primary pollutants. Earth Atmosphere multiple choice questions and answers covers MCQ questions on topics: Layers of atmosphere, energy in atmosphere, atmospheric pressure and temperature, air pollution and human health, cleaning up air pollution, global winds, human caused pollution sources, ozone hole, physical science, primary pollutants, solar energy, wind, and air pressure, and winds storms. Earth Models and Maps multiple choice questions and answers covers MCQ questions on topics: Introduction to topographic maps, earth maps, map projections, earth surface mapping, azimuthal projection, direction on earth, earth facts, earth system science, elements of elevation, equal area projections, equator, flat earth sphere, flat earth theory, Geographic Information System (GIS), GPS, latitude, longitude, modern mapmaking, north and south pole, planet earth, prime meridian, remote sensing, science experiments, science projects, topographic map symbols, and Venus.

If you want to learn about astronomy, then check out HowExpert Guide to Astronomy. Join Ryan T. Kirby, an experienced astronomer, and educator, in an exploration that will take you to the stars! In this short book, Ryan aims at teaching you everything you need to know about astronomy and stargazing from scratch! The book is divided into five sections, which are as follows: 1. Understanding the Universe: Ryan brings you up to speed on all the

essential terminology and concepts vital to your ability to learn astronomy. 2. Planning your Observation: Discover everything you should do to prepare to go outside and observe the night sky! 3. Exploring the Night Sky: A section where Ryan offers detailed instructions on how to begin observing and learn the night sky while bringing in some helpful tips and tricks from his personal experiences. 4. Unique Events and Activities to Try: A section dedicated to some astonishing events astronomers should look out for and some of his favorite activities and observations, along with detailed advice on tackling them. 5. Fun Facts and Misconceptions: Ryan uniquely closes the book by briefly explaining many surprising, interesting, and unexpected facts about space! This book brings readers into the world of astronomy with ease and offers expert advice and guidelines for approaching the daunting hobby. While aimed at Northern hemisphere residents, many tips, tricks, and techniques are relevant even under entirely different skies than those he mentions throughout the book. About the Expert Ryan Thomas Kirby has served as an educator for half a decade and has received numerous academics and leadership awards during his academic career. Ryan has had experience as a teaching assistant for astronomy courses, an observatory assistant, a supplemental instructor for astronomy courses at a community college, and an educator in numerous other positions. His experience educating in the field of astronomy is rivaled by his experience researching the field. Notably, he has used T.H.E.M.I.S. data from the surface of Mars to investigate the ages of ancient lava flows and imaged densely packed star clusters to learn about their ages, along with other research contributions. Ryan continues to educate others on astronomy topics and continues to contribute to research in the field with plans to further narrow his research in a search for moons around extrasolar planets as he progresses his academic career. Ryan is an alumnus of both Bristol Community College and Wheaton College in Massachusetts. He studied astronomy and physics and has held various leadership and educational positions at both colleges during his tenure. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

"PRAXIS EARTH AND SPACE SCIENCES Study Guide" 600 questions and answers. Essential definitions and concepts. Topics: Calculations, Earth's Origin, Save Our Planet, Minerals, Rocks, Weathering, Groundwater, Running Water, Glaciers, The Changing Crust, The Oceans, Maps, The Atmosphere, Wind, Weather Patterns, Introduction to Astronomy [=====] ADDITIONAL GENERAL SCIENCES WORKBOOKS: "PRAXIS 2 Prep Flashcard Workbook: CHEMISTRY" 700 questions and answers. Essential definitions, formulas, concepts, and sample problems. Topics: Introduction, Matter, Atoms, Formulas, Moles, Reactions, Elements, Periodic Table, Electrons, Chemical Bonds, Heat, Gases, Phase Changes, Solutions, Reaction Rates, Equilibrium, Acids and Bases, Oxidation and Reduction, Introduction to Organic Chemistry, Radioactivity _____ "PRAXIS 2 Prep Flashcard Workbook: PHYSICS" 600 questions and answers. Essential definitions, formulas, concepts, and sample problems. Topics: Measurement, Motion and Forces, Work and Energy, Heat and Gases, Atoms, Fluids, Sound, Light and Optics, DC Circuits, Magnetism, AC Circuits [=====] "EXAMBUSTERS PRAXIS Prep Workbooks" provide comprehensive PRAXIS review--one fact at a time--to prepare students to take practice PRAXIS tests. Each PRAXIS study guide focuses on fundamental concepts and definitions--a basic overview to begin studying for the PRAXIS exam. Up to 600 questions and answers, each volume in the PRAXIS series is a quick and easy, focused read. Reviewing PRAXIS flash cards is the first step toward more confident PRAXIS preparation and ultimately, higher PRAXIS exam scores!
