Is the end in sight for college tuition hikes? Tuition and fees at public colleges and universities consistently have risen twice or

even three times as fast as comparable increases in the Consumer Price Index in recent years. Since 2000 these costs have even grown 60 percent faster than health care costs. The results have been rapidly rising student debt (now \$1.4 trillion nationally), rising delinquencies in debt repayment, and a dysfunctional stratification of public college student bodies on the basis of family incomes. This is a broken, unsustainable model for the majority of public colleges. Why has this occurred? The multiple causes include declining state support, the avaricious behavior of individual institutions, their reluctance to adopt productivity-increasing innovations, their cost-increasing competition for higher U.S. News ratings, and misdirected federal student financial aid policies. The key actors are the 50,000 members of the governing boards of public colleges, who too often forget that their primary

responsibility is to citizens, taxpayers, and the 15 million students. Instead, board members are co-opted by clever administrators into approving tuition and fee increases well beyond what is needed to make up for declining state funding. Concerted, informed public pressure on governors, legislators, and board members is necessary to move institutions in more positive directions. Higher education funding and tuition and fee inflation are complicated matters that very few people understand well. The Impoverishment of the American College Student clarifies the central issues and provides plentiful data to support its key points. It is a must-read for anyone who believes that maintaining access to and the affordability of public colleges are vitally important to our society's future.

***** What makes Colleges That Create Futures important? You've seen the headlines—lately the news has been full of horror stories about how the college educational system has failed many recent grads who leave school with huge debt, no job prospects, and no experience in the working world. Colleges That Create Futures identifies schools that don't fall into this trap but instead prepare students for successful careers! How are the colleges selected? Schools are selected based on survey results on career services, grad school matriculation, internship support, student group and government activity, alumni activity and salaries, and noteworthy facilities and programs.

James Grime shows how to build subtly mischievous dice for playing slightly unfair games and Michael Barany traces how our appreciation of the societal importance of mathematics has developed since World War II. In other essays, Francis Su extolls the inherent values of learning, doing, and sharing mathematics, and Margaret Wertheim takes us on a mathematical exploration of the mind and the world—with glimpses at science, philosophy, music, art, and even crocheting. And there's much, much more. In addition to presenting the year's most memorable math writing, this must-have anthology includes an introduction by the editor and a bibliography of other notable pieces on mathematics. This is a must-read for anyone interested in where math has taken us—and where it is headed.
