taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

This book constitutes the refereed proceedings of the 7th International Conference on Concept Mapping, CMC 2016, held in Tallinn, Estonia, in September 2016. The 25 revised full papers presented were carefully reviewed and selected from 135 submissions. The papers address issues such as facilitation of learning; eliciting, capturing, archiving, and using "expert" knowledge; planning instruction; assessment of "deep" understandings; research planning; collaborative knowledge modeling; creation of "knowledge portfolios"; curriculum design; eLearning, and administrative and strategic planning and monitoring.

Worldwide, in Africa and in South Africa, the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened attention has not only been concerned with the traditional role of the PhD, namely the provision of future academics; rather, it has focused on the increasingly important role that higher education - and, particularly, high-level skills - is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust (CHET) and the Centre for Research on Evaluation, Science and Technology (CREST), as well as on studies from the rest of Africa and the world. In addition to the historical studies, new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994, and continues to struggle with, if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

Threshold Concepts on the Edge explores new directions in threshold concept research and practice and is of relevance to teachers, learners, educational researchers and academic developers.

Read Free Doctoral Concept Paper Examples

The rapid expansion of doctoral education in social work is changing academia, and expanding the expectations of education for professional practice. This volume focuses on the early development, gradual evolution and present status of social work doctoral education. Relevant for social work students and educators globally, it represents an authoritative statement authored by widely recognized educators who are on the cutting edge of doctoral education. Documenting the current state-of-the-art, this comprehensive book demonstrates the rapidly growing importance of doctoral-level education in the social work profession. The authors look closely at current trends, and address the emerging pedagogical issues that will likely frame the future. This book was originally published as a special issue of the *Journal of Teaching in Social Work*.

This book explores new perspectives on how to improve the chances of success regarding capacity building in developing and emerging countries. Drawing on lessons learned in the course of six decades of capacity building research and practice, it identifies the required conditions for the success of capacity building efforts, and suggests that a radical change in mindset has become a critical aspect in developing countries. In addition, the book discusses capacity building in connection with entrepreneurship (especially female entrepreneurship), transnational diaspora remittances, and combating corruption, which it considers to be essential drivers of sustainable development in developing and emerging countries. The book's contributing authors represent the leading minds in capacity building research and practice, and include researchers from prestigious universities in North America, Europe and Africa, as well as international development experts from institutions such as the International Monetary Fund (IMF), the World Bank, African Development Bank, and African Capacity Building Foundation. All authors have considerable expertise regarding capacity building issues, and represent 26 emerging and developing countries in Africa, Asia, the Middle East, Caribbean Islands, North America and Europe.

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

Identifies and describes specific government assistance opportunities such as loans, grants, counseling, and procurement contracts available under many agencies and programs.
