Figure 8-55 shows a three dimensional view of the volcanic arc region associated with the Antilles Island Chain in the Caribbean Sea region. The most extensive regions on Earth where volcanism is occurring, but is not visible, is along the submarine mid-ocean ridges associated with plate-tectonic spreading centers. Iceland is an exposed portion of the Mid-Atlantic Ridge, and has at least 17 volcanoes showing active or recent activity.

Earth Science - ClassZone

Earth Science Christian School Educational Materials. Earth Science is an expanding study that moves from the Earth's lithosphere to the rest of the universe. Students will build their critical thinking skills as they study the major theories in earth science and follow those theories through to their conclusions.
