KUKA robots perform machining tasks like machine tools - and can be programmed like them too in G-code (DIN 66025) thanks to the KUKA.CNC user interface. Users understand them straight away, can create programs using a CAD/CAM process chain and, after simulation, execute them on the robot without having to compile them into the robot language.

Kuka Robot Language Manuals Krc4

I am working with a CPU1212C and a KUKA robot with the KRC4 controller  
and I'm using the PLC to control the robot programs and monitor useful  
variables. The issue I'm having is that the communication between the  
PLC and robot controller seems to fail intermittently (every 5 seconds  
approx).
