In 2019, Euromonitor International's Health and Nutrition Survey found that 51% of global respondents asked, get their vitamins and nutrients from foods, rather than taking supplements. Yet, the fortified functional snacking segment has the best growth prospects with emerging markets, particularly Latin America.

Core nutrition trends in 2020 and beyond demand more from ...

Most research on food demand has investigated the role of income growth on the amount and composition of food consumption. Also the role of education and nutrition knowledge on food diets has received considerable attention. Yet, while it is widely acknowledged that the rapid urbanization of Sub-Saharan Africa is playing an important role in observed changes in food demand, our understanding of the impact of urbanization is very limited.
