Drawing on in-depth analysis of eleven countries across Africa, Asia ,and Latin America this book shows how financial globalisation is changing politics of regulation in developing countries.

In the years since the 2008 financial crisis, U.S. federal prosecutors have brought dozens of criminal cases against the world's most powerful banks, charging them with helping their customers evade taxes, manipulating financial indices, evading sanctions, and laundering money. To settle these cases, global banks like UBS, Barclays, HSBC, and BNP Paribas paid tens of billions of dollars in fines. They also agreed to extensive internal reforms, hiring hundreds of compliance officers, spending billions on new systems, and installing independent corporate monitors. In effect, they agreed to become worldwide enforcers of U.S. laws and

policies, including financial sanctions--sometimes in spite of their own governments' protests. This book examines the U.S. enforcement campaign against global banks across four areas: benchmark manipulation, tax evasion, sanctions violations, and sovereign debt. It shows that U.S. prosecutors have unilaterally carved out a new role as global bank regulators, heralding a fundamental shift in how international finance is overseen. Their ability to do so stems from U.S. control over vital hubs of the international financial system, where they can threaten global banks with exclusion. In some areas, these unilateral U.S. actions have ushered in important multilateral reforms, such as the rise of automatic tax information exchange and better regulated financial indices. In other areas, such as financial sanctions, unilateralism has attracted protests from other states and attempts to bypass U.S.-based financial infrastructure, which could undermine the country's power.

The Oxford Handbook of Banking provides an overview and analysis of state-of-the-art research in banking written by leading researchers in the field. It strikes a balance between abstract theory, empirical analysis, and practitioner and policy-related material.
