Mersen fuses for the protection of transformers and distribution lines deliver overload and short circuit protection. These current-limiting fuses will melt at current that can be as low as 1.7 times the fuse current ratings up to its maximum interrupting rating. These fuses are designed to withstand the transformer magnetizing inrush current.

On one hand, you need current-limiting protection for medium-voltage transformers and distribution systems. On the other, you need short circuit protection for medium-voltage motors and motor controllers. Ferraz Shawmut's line of medium-voltage UL Listed fuses fills the bill with E-rated, R-rated and capacitor fuses.

For your fuse to do its job correctly and protect your wires, it should be rated about 1.1 to 1.5 times the rated current value. It's also a great idea to get an ATC fuse holder to protect and mount your fuse. One common misconception about choosing the correct fuse size is that it's dependent on the load of the circuit.
