Software Architecture Document. Distributed Team Collaboration Processes II Tool (DTCPII tool) Ivan Dontsov, Andy Phenix, Maureen Rottschaefer. Version 1.4. March 2012 Revision History. The revision history cycle begins once changes or enhancements are requested after the initial version of the Software Architecture Document has been completed.

Software Architecture Document Template

What Is a Software Architecture Document? A software architecture document is a map of the software. We use it to see, at a glance, how the software is structured. It helps you understand the software's modules and components without digging into the code. It's a tool to communicate with others—developers and non-developers—about the software. For example, a three-tier application architecture looks like this:
