(PDF) Stuffed and Starved: Markets, Power and the Hidden ... The Hidden Battle for the World Food System Raj Patel "For anyone attempting to make sense of the world food crisis, or understand the links between U.S. farm policy and the ability of the world's poor to feed themselves, Stuffed and Starved is indispensable." —Michael Pollan, author of The Omnivore's Dilemma

Stuffed and Starved » Melville House Books Stuffed And Starved: From Farm to Fork: The Hidden Battle For The World Food System: Author: Raj Patel: Publisher: Granta Publications, 2013: ISBN: 1846275059, 9781846275050: Subjects

Revised and Expanded Edition "For anyone attempting to make sense of the world food crisis, or understand the links between U.S. farm policy and the ability of the world's poor to feed themselves, Stuffed and Starved is indispensable." —Michael Pollan, author of The Omnivore's Dilemma It's a perverse fact of modern life: There are more starving people in the world than ever before, while there are also more people who are overweight. To find out how we got to this point and what we can do about it, Raj Patel launched a comprehensive investigation into the global food network. It took him from the colossal supermarkets of California to India's wrecked paddy-fields and Africa's bankrupt coffee farms, while along the way he ate genetically engineered soy beans and dodged flying objects in the protestor-packed streets of South Korea. What he found was shocking, from the false choices given us by supermarkets to a global epidemic of farmer suicides, and real reasons for famine in Asia and Africa. Yet he also found great cause for hope—in international resistance movements working to create a more democratic, sustainable and joyful food system. Going beyond ethical consumerism, Patel explains the steps, from seed to store to plate, to regain control of the global food economy, stop the exploitation of both farmers and consumers, and rebalance global sustenance.

Today, in the West, we appear to have the world on our plates, regardless of source or season. But this apparent luxury of choice is only possible because rural communities the world over have had their choices taken away. To understand how our supermarket shopping makes us complicit in denying freedom to the world's poorest, and how we ourselves are poisoned by our choices, we need to think about the way our food comes to us. Having worked with international policy makers, visited local farming collectives in Brazil and Mexico, investigated the all-powerful distribution networks, and gone behind the scenes in the kitchens of Europe's McDonald's restaurants, Raj Patel is able to take a long and wide view of food production and tell the story of commercial greed and helpless hunger that lies behind every meal we eat.

We have so much choice over what we eat today because rural communities all over the world have had their choices taken away. To understand how our supermarket shopping makes us complicit in a system that routinely denies freedom to the world's poorest, and how we ourselves are poisoned by these choices, we need to think about the way our food comes to us. Stuffed and Starved takes a long and wide view of food production, to show how we all suffer the consequences of a food system cooked to a corporate recipe. This is also the story of the fight against the unthinking commerce that brings it to us. In the wrecked paddy fields of India, in the soy deserts of Brazil, in the maize ejidos of Mexico, the supermarket aisles of California, French McDonald's and Italian kitchens, there's a worldwide resistance against unhealthy control of the food system.

"A deeply though-provoking book about the dramatic changes we must make to save the planet from financial madness."—Naomi Klein, author of The Shock Doctrine Opening with Oscar Wilde's observation that "nowadays people know the price of everything and the value of nothing," Patel shows how our faith in prices as a way of valuing the world is misplaced. He reveals the hidden ecological and social costs of a hamburger (as much as \$200), and asks how we came to have markets in the first place. Both the corporate capture of government and our current financial crisis, Patel argues, are a result of our democratically bankrupt political system. If part one asks how we can rebalance society and limit markets, part two answers by showing how social organizations, in America and around the globe, are finding new ways to describe the world's worth. If we don't want the market to price every aspect of our lives, we need to learn how such organizations have discovered democratic ways in which people, and not simply governments, can play a crucial role in deciding how we might share our world and its resources in common. This short, timely and inspiring book reveals that our current crisis is not simply the result of too much of the wrong kind of economics. While we need to rethink our economic model, Patel argues that the larger failure beneath the food, climate and economic crises is a political one. If economics is about choices, Patel writes, it isn't often said who gets to make them. The Value of Nothing offers a fresh and accessible way to think about economics and the choices we will all need to make in order to create a sustainable economy and society.

Introduction -- Cheap nature -- Cheap money -- Cheap work -- Cheap care -- Cheap food -- Cheap energy -- Cheap lives -- Conclusion

Today there are over a billion hungry people on the planet, more than ever before in history. While the global food crisis dropped out of the news in 2008, it returned in 2011 (and is threatening us again in 2012) and remains a painful reality for the world's poor and underserved. Why, in a time of record harvests, are a record number of people going hungry? And why are a handful of corporations making record profits? In *Food Rebellions!* Crisis and the Hunger for Justice, authors Eric Holt-Giménez and Raj Patel with Annie Shattuck offer us the real story behind the global food crisis and document the growing trend of grassroots solutions to hunger spreading around the world. *Food Rebellions!* contains up to date information about the current political and economic realities of our food systems. Anchored in political economy and an historical perspective, it is a valuable academic resource for understanding the root causes of hunger, growing inequality, the industrial agri-foods complex, and political unrest. Using a multidisciplinary approach, Holt-Giménez and Patel give a detailed historical analysis of the events that led to the global food crisis and document the grassroots initiatives of social movements working to forge food sovereignty around the world. These social movements and this inspiring book compel readers to confront the crucial question: Who is hungry, why, and what can we do about it?

A beloved chef takes on institutional food and sparks a revolution Good food generally doesn't arrive on a tray: hospital food is famously ridiculed, chronic student hunger is deemed a rite of passage, and prison meals are considered part of the punishment. But Chef Joshna Maharaj knows that institutional kitchens have the ability to produce good, nourishing food, because she's been making it happen over the past 14 years. She's served meals to people who'd otherwise go hungry, baked fresh scones for maternity ward mothers, and dished out wholesome, scratch-made soups to stressed-out undergrads. She's determined to bring health, humanity, and hospitality back to institutional food while also building sustainability, supporting the local economy, and reinvigorating the work of frontline staff. Take Back the Tray is part manifesto, part memoir from the trenches, and a blueprint for reclaiming control from corporations and brutal bottom lines. Maharaj reconnects food with health, wellness, education, and rehabilitation in a way that serves people, not just budgets, and proves change is possible with honest, sustained commitment on all levels, from government right down to the person sorting the trash. The need is clear, the time is now, and this revolution is delicious.

Popularized by such best-selling authors as Michael Pollan, Barbara Kingsolver, and Eric Schlosser, a growing food movement urges us to support sustainable agriculture by eating fresh food produced on local family farms. But many low-income neighborhoods and communities of color have been systematically deprived of access to healthy and sustainable food. These communities have been actively prevented from producing their own food and often live in "food deserts" where fast food is more common than fresh food. Cultivating Food Justice describes their efforts to envision and create environmentally sustainable and socially just alternatives to the food system. Bringing together insights from studies of environmental justice, sustainable agriculture, critical race theory, and food studies, Cultivating Food Justice highlights the ways race and class inequalities permeate the food system, from production to distribution to consumption. The studies offered in the book explore a range of important issues, including agricultural and land use policies that systematically disadvantage Native American, African American, Latino/a, and Asian American farmers and farmworkers; access problems in both urban and rural areas; efforts to create sustainable local food systems in low-income communities of color; and future directions for the food justice movement. These diverse accounts of the relationships among food, environmentalism, justice, race, and identity will help guide efforts to achieve a just and sustainable agriculture.

This book represents the first harvest in the English language of the work of the Land Research Action Network (LRAN). LRAN is an international working group of researchers, analysts, nongovernment organizations, and representatives of social movements. -- pref.

"A meticulously researched tour de force" on politics, big agriculture, and the need to go beyond farmers' markets to find fixes (Publishers Weekly). Wenonah Hauter owns an organic family farm that provides healthy vegetables to hundreds of families as part of the Community Supported Agriculture (CSA) movement. Yet, as a leading healthy-food advocate, Hauter believes that the local food movement is not enough to solve America's food crisis and the public health debacle it has created. In *Foodopoly*, she takes aim at the real culprit: the control of food production by a handful of large corporations—backed by political clout—that prevents farmers from raising healthy crops and limits the choices people can make in the grocery store. Blending history, reporting, and a deep understanding of farming and food production, *Foodopoly* is a shocking, revealing account of the business behind the meat, vegetables, grains, and milk most Americans eat every day, including some of our favorite and most respected organic and health-conscious brands. Hauter also pulls the curtain back from the little-understood but vital realm of agricultural policy, showing how it has been hijacked by lobbyists, driving out independent farmers and food processors in favor of the likes of Cargill, Tyson, Kraft, and ConAgra. *Foodopoly* shows how the impacts ripple far and wide, from economic stagnation in rural communities to famines overseas, and argues that solving this crisis will require a complete structural shift—a change that is about politics, not just personal choice.
